***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrew Zager on February 14, 2007.

In the specification, after paragraph [0033] the following has been inserted:

--FIGS. 15A illustrates a side view of a catheter employing an actuating lumen that terminates at some point along the length of the shaft in accordance with one embodiment of the invention.

FIG. 15B illustrates the catheter of FIG. 15A when fluid is within the actuating lumen.

FIG. 16 illustrates a section view of the catheter with actuating lumen shown in FIGS. 15A, B.

FIGS. 17A illustrates a side view of a catheter employing a plurality of actuating lumens terminating at some point along the length of the shaft in accordance with one embodiment of the invention.

FIG. 17B illustrates the catheter of FIG. 17A with fluid introduced into the lower actuating lumen.

FIG. 18 illustrates a section view of the catheter with a plurality of actuating lumens shown in FIGS. 17A, B. --

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: applicant's amendments to recite the specific "vortex" motion for the ablation fluid is deemed to distinguish over the prior art of record. As asserted in the Final Office action, the prior art is deemed to provide a broadly interpreted "swirling" motion for the fluid based on the turbulent flow pattern. However, the prior art is silent with respect to providing a specific "swirling vortex" which would, as presented in applicant's specification at

paragraph 0068, provide for more uniform heating of the ablation fluid. It is noted that applicant's newly added independent claim 13 recites the same basic structure and uses "means plus function" language to recite the swirling vortex motion for the ablation fluid flow. The above Examiner' Amendment was made to provide a brief description for all the figures.

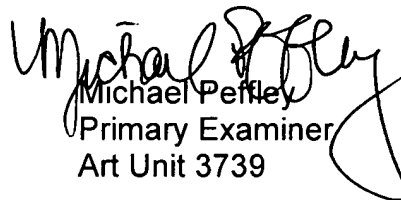

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Peffley whose telephone number is (571) 272-4770. The examiner can normally be reached on Mon-Fri from 6am-3pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda Dvorak can be reached on (571) 272-4764. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
